Novelties and Varieties of Recent Introduction

Dormant Stock for Delivery Winter 1932 to 1933

Awarded Gold Medal at the Great Atlantic City Flower and Garden Pageant, September, 1931.

Awarded Gold Medal at the International Flower Show, New York City, March, 1932.

Awarded Gold Medal Sweep Stake Prize for Garden of 1800 Olympiad Roses, Philadelphia Flower Show, March, 1932.

New Hybrid-Tea Rose, Olympiad

Olympiad is one of the late Mr. Pernet-Ducher's seedlings which did not develop its bloom until after this great rosarian passed away in 1929. It was shown in France under the name Mme. Raymond Guajard but is now known as Olympiad which name was adopted in connection with the International Olympic games held in California this year.

The color of Olympiad is unique, a lustrous, dark oriental-scarlet, its depth and warmth accentuated by a bright golden base and is intensified by a marvelous velvety sheen that makes its rich coloring particularly effective, especially under artificial light.

The bud is long and pointed, the petals are very broad and the blossom is magnificent in every stage of development.

We are now booking orders for fall and winter delivery at **\$50.00** per 100; **\$400.00** per 1000; 500 or more supplied at 1000 rates.

Autumn (L. B. Coddington, 1928). Novel and distinct in coloring, burnt orange streaked and marked with red. Bud of medium size developing into a cupped double, fragrant, attractive flower. **\$50.00** per 100.

Betty Suttor (McGredy, 1929). Exquisite both in the long bud and high-centered, large, double, tea-scented flower. Inside of petals delicate rosy pink; as the flower opens there is a delightful reflecting of the petals which enhances the beauty of the pink tones. Strong, vigorous and free flowering. **\$75.00** per 100.

Duchess of Montrose (Dobbie & Co., 1930). Sweetly scented, vermilion crimson, moderately sized, shapely buds and flowers. **\$50.00** per 100.

Edith Nellie Perkins (Alex. Dickson & Sons, 1928). A Rose of outstanding merit, vigorous in growth and free flowering. Long, pointed bud; flower of good size, long lasting and fragrant, double; outside of petals orient-red shaded cerise-orange; inside salmon-pink, **\$40.00** per 100.

New Hybrid-Tea Rose, Olympiad

Golden Dawn (P. Grant, 1929). An ideal yellow garden Rose. The ovoid lemon yellow bud is heavily splashed with crimson before opening and develops into a well-formed, sweetly-scented, large, double, sunflower yellow flower that reminds of the old favorite Marechal Niel. Strong, vigorous and free flowering. **\$35.00** per 100.

Heinrich Wendland (W. Kordes Sons, 1930). Buds large, long pointed and very large, double, full, high centered, intensely fruity fragrant flower of unfading nasturtium red color, the reverse of the petals a deep golden-yellow. Growth vigorous; flowering intermittently throughout the season. **\$50.00** per 100.

Impress (Alex Dickson & Sons, 1929). Very large, full, absolutely perfect blooms that last in perfection a long time; color salmon-cerise suffused with a luminous golden sheen; the bud is large, of ovoid form, cardinal-red, shaded orange; growth strong; a free and continuous bloomer. **\$50.00** per 100.

This Year's New Hybrid-Tea Roses—Continued

Novelties and Varieties of Recent Introduction

Hybrid-Tea Rose, Golden Dawn

Mrs. Sam McGredy (McGredy, 1929). The color of this beautiful variety is quite distinct from anything yet seen in Roses, a wonderful dual combination of vivid shades. A beautiful scarlet coppery-orange is heavily flushed with Lincoln-red on the outside of the petals, and these colors together give a rich and almost dazzling effect. The flowers are of large size and beautiful form, and they possess the proper fullness to make them useful for all purposes. They are very freely produced and delicately perfumed. The plant has a vigorous and exceptionally free habit and is one of the best all-purpose varieties. **\$40.00** per 100.

Portadown Fragrance (McGredy, 1930). A Rose that pleases not only on account of its beautiful formation and color but also for its remarkable sweet fragrance, described by its introducer as surpassing any other variety. The bud is long-pointed; the flower very large, double, high-centered and unusually long lasting. Color brilliant orange-scarlet passing to bright rose towards the edge of the petals; of vigorous habit and free flowering. **\$50.00** per 100.

Schwabehland (Pfitzer, 1928). There are many pink Roses but none just like this new variety either in color or in the splendid formation of its blooms. The flowers are large, over five inches in diameter, with high spiral centre, the petals having a peculiar twist or curl. In color it is a luminous rich rose-pink, retaining its brightness until the petals drop. The flowers are carried singly on long stiff stems. A strong, healthy, hardy, vigorous grower and free flowering. **\$35.00** per 100.

Vaterland (Pfitzer, 1928). The most distinct dark colored variety yet introduced, deeper and richer in effect than the Hybrid-Perpetual variety Prince Camille de Rohan, a rich, deep, velvety scarlet maroon and a splendidly formed, high-centered flower of remarkable keeping qualities. The plant is of vigorous strong erect habit with healthy foliage and free and perpetual flowering; unquestionably the best of this type that has yet come to our notice. **\$35.00** per 100.

Lady Forteviot (B. R. Cant, 1928). Large, double, high-centered, lasting, extremely fragrant, golden yellow flower, changing to deep apricot, flushed with cardinal-red, borne several together on long stems; free and continuous bloomer. **\$35.00** per 100.

Lucie Marie (Alex Dickson & Sons, 1930). Very long pointed buds, deep yellow splashed with rosy red. As the outer petals unfold, the inner face is yellow with coppery venation with the petals lightly tipped with pink, slightly fragrant. It is of strong, vigorous, healthy habit of growth with dark leathery foliage. A most distinct and interesting bedding variety. **\$35.00** per 100.

Lucile Rand (Pernet Ducher, 1930). Bud long pointed; well-formed, large, high-centered, delicately sweet-scented, very double flower of a lively rosy-carmine; free and continuous bloomer. **\$35.00** per 100.

Marchioness of Linlithgow (Dobbie & Co., 1930). Color rich deep velvety-crimson; very shapely, long bud and moderately double flowers which are exceptionally sweetly scented. **\$50.00** per 100.

McGredy's Scarlet (McGredy & Son, 1930). A new red Rose of marked superiority on account of its strong vigorous growth, free and continuous habit of flowering and its brilliant color. The flowers are of good size, full double of a brilliant scarlet, orange yellow at base of petals, the upper portions of same being lightly touched with crimson, varying some in color under changing weather conditions but always beautiful. **\$35.00** per 100.

Mme. Jules Guerin (Gaujard, 1931). An exceptionally large, fragrant, well formed, full double flower frequently measuring over 6 inches in diameter. The long, shapely buds when first expanding are golden-yellow passing to creamy-yellow as they develop. The plant is very vigorous in growth, free flowering and the blooms are carried on strong stout stems. **\$50.00** per 100.

Mme. Nicolas Aussel (Pernet-Ducher, 1930). In a French contest, Sept. 15th, 1931, was voted an award of a Gold Medal as The Most Beautiful Rose in France. An outstanding introduction of the late Mr. Pernet-Ducher. In color a bright coppery-red in the very long, shapely, tapering bud that develops into a large, full double flower of an exquisite opalescent salmon-pink. Growth vigorous and healthy, free and continuous bloomer. **\$40.00** per 100.

New Hardy Everblooming Climbing Roses

THE NEW DAWN THE EVERBLOOMING DR. W. VAN FLEET

The First Plant Patented Under the United States Patent Laws.

A counterpart of the beautiful, popular, flesh-pink Rose Dr. W. Van Fleet, excepting that it is perpetual flowering throughout the season.

Patent Number 1, the first patent issued August 18, 1931, under the new Patent Law has been granted to the originators of the New Dawn Rose, giving them the sole rights for the propagation of this desirable new variety.

This new Rose is a sport from Dr. Van Fleet which is universally acknowledged as the best and most popular American Climbing Rose. This new variety is identical in every way with its parent in size and formation of its long pointed flesh pink buds and double flowers, but blooms continuously throughout the summer and fall months. Really the first worth while Hardy Everblooming Climber introduced. We have distributed many thousands of this everblooming gem since its first introduction in the spring of 1931.

We are exclusive wholesale distributors of this valuable acquisition. Our arrangement with the originators is that the wholesale purchaser shall re-sell these plants only at retail and no license to reproduce same for sale is granted.

For the fall of 1932 and spring of 1933 our retail price will be \$1.50 each and we will supply the trade at the rate of \$75.00 per 100 for strong two-year-old, budded, field-grown plants. We will have an ample supply to meet all demands and are now prepared to book orders for fall or spring delivery at prices noted above.

We offer this variety and will supply same only with the understanding that the plants are accepted by you under this arrangement.

CLIMBING ROSE, BLAZE THE NEW HARDY EVERBLOOMING SCARLET AWARDED UNITED STATES PLANT PATENT NO. 10

A marvelous new hardy climbing Rose which inherits the blazing color of Paul's Scarlet Climber and the ever-blooming habit of Gruss an Teplitz, thus combining the most attractive features of both of its parents. It is a very vigorous climbing variety which will grow to considerable height and produce flowers on both the old and new growth. A Rose that is destined to enormous popularity.

Plant Patent Number 10 has been granted to the introducers of the Rose Blaze giving them the sole rights for the propagation of this variety and we will supply same only with the understanding that the plants are accepted by you under this arrangement.

We shall catalogue this new Everblooming Climber at \$2.00 each at retail and we will supply the trade at \$1.50 each in quantities of less than 10 plants, 10 plants or more \$1.25 each and in lots of 25 or more at \$1.00 each.

Pyracantha (Crataegus) Coccinea Lalandi

(Firethorn or Evergreen Thorn)

There is no other fruiting evergreen Shrub that is so attractive throughout the year as this fiery Thorn, and which will succeed in any fairly sunny position, developing into a shapely plant 6 or more feet high; it may be planted either in connection with other Shrubs or as a single specimen or may be trained with wonderful effect against a wall. Its large trusses of white flowers are followed in summer by an abundance of brilliant orange-scarlet berries, which, remaining on the plants throughout the winter produce a gorgeous effect. Strong bushy pot-grown plants 15 to 18 inches high, 75 cts. each; \$8.50 per doz.; \$65.00 per 100.

Viburnum Carlesii

A rare Korean variety which is entirely distinct with salver-shaped flowers of a delicate rose tinted white, passing to white sweet-scented flowers produced in terminal subglobose cymes 2 to 3 inches in diameter, reminding one somewhat of a spray of *Bouvardia*. Good bushy specimens 2 to 2½ feet high, \$1.50 each.

Viburnum Rhytidophyllum

A rare variety, particularly attractive on account of its large dark green nearly evergreen foliage, the yellowish white flowers are followed in September by red berries finally turning black. 4-inch pots, 75 cts. each; 7-inch pots, \$1.50 each.

Vitex Macrophylla

In general habit similar to *V. Agnus Castus*, but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is likely to become as popular as the *Butterfly Shrub*.

Field-grown plants, two-year old, 15 to 18 inches high, \$2.50 per doz. \$20.00 per 100.

Dreer's Celebrated Lawn Grass Seeds

Lawns made in the Fall have many advantages over those made during the Spring, as the conditions are ideal for quick germination of seed, and grass will make deeper roots and more healthy growth. We use only the highest quality of Recleaned and Perennial Grass and Clover Seeds in the composition of our lawn mixtures. No cheap annuals such as Timothy are included for we aim to produce permanent results rather than a quick but temporary effect. Put up in attractive and convenient-sized cartons, they make a very necessary and profitable side line for every Florist to stock.
